

# Weekly Coal Production

DOE/EIA-0218(93-46)  
Production for Week Ended:  
November 13, 1993

# EIA

Energy  
Information  
Administration

**SUMMARY**—As estimated by the Energy Information Administration (EIA) from data on railroad car loadings, U.S. coal production totaled 19 million short tons during the week ended November 13, 1993. This was about the same as in the previous week, and 7 percent lower than in the comparable week in 1992. Production east of the Mississippi River totaled 11 million short tons, and production west of the Mississippi River totaled 8 million short tons. Contract talks between the Bituminous Coal Operators' Association and the United Mine Workers of America continued.
